

Annex F (normative)

Abbreviations used in the construction of labels

F.1 Introduction

[Table F.1](#) lists the abbreviations used in the construction of labels. In the specification of an abbreviation, the letters in the word or phrase used to form the abbreviation are underlined.

The notation "[nnn]" where nnn represents one or more letters means that the letters between the brackets are appended to the base word or partial word in the indicated position to give alternate but related words that have the same abbreviation. Thus the entry "adjust[ed][ment]" means that both the word "adjusted" and the word "adjustment" may be abbreviated with the abbreviation "ADJ" in the adjacent column.
