# UK Comments on ISO/IEC 18023-1:2006/FPDAM1:201x

## **Please note that in the following comments;**

Additional change instructions are recommended for comments that relate to clauses that are not currently included in this amendment.

Comments that make reference to <...> tags refer to the html code for the associated clause.

## **General**

The following comments apply to the entire document:

- G1:** All hyperlinks should be checked to ensure that obsolete references currently in ISO/IEC 18023-1:2006 are replaced by up-to-date references. Change instructions to affect this should be added to the amendment.
- G2:** It is not clear that the hyperlink to the publicly available standard is correct once the amendment has been approved. If the amendment is to be published as a new revision, the hyperlink should be updated. If the amendment is to be published as an amendment, the hyperlink should be replaced by a hyperlink to the home page for publicly available standards.
- G3:** When this document is displayed by a browser, the displayed title is "ISO/IEC 18023-1:2006/PDAM:200x", whereas it should be "ISO/IEC 18023-1:2006/FPDAM:200x"

## **Technical**

### ***Foreword***

- T1:** Add a change instruction to remove the last paragraph of the Foreword as it is now obsolete.

### ***2 Normative references***

- T2:** The reference to ISO/IEC 18023-2 should become an undated reference, as ISO prefers to use undated references where possible.
- T3:** The reference to ISO/IEC 18023-3 should be updated to reflect the amendment that is being co-processed with this amendment.
- T4:** All other dated references should be checked to ensure that the most recent appropriate version is being used.

### ***Annex C—Format references***

- T5:** Many of the links to the format references are broken in ISO/IEC 18023-1:2006. All links in this annex should be checked and, when necessary, replaced by

corresponding working links. Appropriate change instructions should be added to the amendment to support these updates.

## **Editorial**

### **4 Concepts**

- E1: There are several instances of incorrect HTML that have been added due to editing the file using MS Word. These should be removed and the HTML cleaned up.
- E2: In the second change instruction for 4.13.10, remove the two incorrect occurrences of underscore characters.

### **5 Fundamental data types**

- E3: Remove the <style> tag and replace any references to its styles with styles from the style sheet.
- E4: There are several instances of incorrect HTML that have been added due to editing the file using MS Word. These should be removed and the HTML cleaned up.
- E5: Remove the inappropriate occurrence of “k” that immediately follows the <body> tag.
- E6: Remove the unnecessary leading between the replacement text for 5.6.3.6 and the merge location specification for 5.6.3.18.

### **6 DRM class definitions**

- E7: Remove the <style> tag and replace any references to its styles with styles from the style sheet.

### **7 DRM class constraints**

- E8: The <title> tag specifies the wrong clause. This should be updated to “ISO/IEC 18023-1 -- 7 DRM class constraints”.
- E9: Remove the <style> tag and replace any references to its styles with styles from the style sheet.

### **Annex A – UML diagrams**

- E10: Remove the unnecessary “&nbsp;” character entity that immediately follows the <body> tag.

### **Annex D – Default field values**

- E11: Remove the <style> tag and replace any references to its styles with styles from the style sheet.
